V. MANAGEMENT DISCUSSION AND ANALYSIS:**a. Sugar Industry - Opportunities, Threats and Future Outlook:****Opportunities:**

The long term outlook for sugar remains positive and promising on account of:

- Removal of Levy obligation recently announced by Government of India will improve the profitability and liquidity of sugar mills for prompt payment of sugarcane dues.
- Removal of Release Mechanism recently announced by Government of India will place the sugar mills in a better financial position and sustained revenue inflow.
- Mandatory blending of Ethanol with petrol will boost the revenue of sugar mills and profitability.
- Growing energy consumption in India allowing the sugar industry to play a vital role.
- Environmental friendly power generated by Cogeneration Units equipped with high-pressure boilers and turbines that intelligently use the fuel to get optimum energy output.
- Expected flow of funds from Trading of Renewable Energy Certificate (REC).
- More emphasize on Bio-composting process and consequent efforts to convert organic and inorganic matter into bio-manure to ensure zero discharge from the distillery combining with press mud.
- Growing demand for bio manure, which works as the perfect soil conditioner. Bio manure made from distillery and organic matter does not allow leaching of chemicals and hence can offer a solution to the problem of depletion of soil productivity.

Threats:

Sugar industry is at present confronted by the following threats:

- Dearth in availability of farm labour for harvesting, transportation, loading and unloading of sugar cane and sugar.
- The spurt in cane procurement prices is expected to remain volatile for a couple of years.
- Cyclical nature of industry and local climatic conditions over the crop affecting both the quantity and quality of cane available.
- Sugar weightage in WPI.
- Short crushing season.

XIII. RISK MANAGEMENT:

The Company has an effective risk management under which all probable risks are periodically identified, assessed and acted upon to minimize and mitigate their impact. These processes are subject to periodical review by the Management. Some of the risks identified are enumerated below:

i. Raw Material Risk:

Sugarcane being the main raw material for sugar, any disturbance in its timely availability will have a substantial impact on the operational cost. This in turn has a significant adverse effect since the market value does not factor the variable cost determined by the climatic conditions and the cane economics.

Mitigation Measure:

The Company always maintains healthy relationship with its farmers. It is one among very few companies in sugar industry paying its farmers within the stipulated time. The risk of raw material short supply is mitigated to

a large extent by the goodwill and reputation for ethical dealings earned by the Company since inception. The experiments in farm mechanisation, drip irrigation, improved cane varieties, carefully monitored scheduling of cane planting and harvesting boost the confidence of the Company in mitigation of the risk.

ii. Policy Risk:

Central and State governments regulate the cane policies and they have a larger control on this industry by determining the raw material price and also influence the sugar selling price. The controls exercised by the Union and State governments over command area demarcation from time to time. Molasses movement control.

Mitigation Measure:

The Company is a member of South Indian Sugar Mills Association (SISMA) and works closely with it towards developing appropriate policy recommendations to represent the industry needs to the government. Formulation of policy on Ethanol doping, review of cogeneration policy, and review of sugar weightage in WPI are some of the issues addressed in close liaison with SISMA.

iii. Cyclicity / Commodity Risk:

The sugar price is determined by the cyclicity of the sugar business and hence it affects the profitability. Sugar being a commodity traded across the world, its price is influenced by the various factors including the normal supply and demand.

Mitigation Measure:

The Company takes the following measures, which enable the Company to insulate itself against price risk.

- More focus on value-added downstream products
- Integration of sugar with cogeneration power and alcohol.

XIII. CORPORATE GOVERNANCE:

Provision is made for income tax liability estimated to arise on the results for the year at the current rate of tax in accordance with the Income Tax Act, 1961.

Deferred tax resulting from timing differences between book and tax profits is accounted for under the liability method, at the current rate of tax.

Deferred tax assets arising on account of brought forward losses and unabsorbed depreciation are recognized only when there is virtual certainty supported by convincing evidence that such assets will be realized. Deferred tax assets arising on other temporary timing differences are recognized only if there is a reasonable certainty of realization.

k. BORROWING COSTS

Borrowing costs that are attributable to the acquisition or construction of qualifying assets are capitalised as part of the cost of such assets. A qualifying asset is one that takes necessarily substantial period of time to get ready for its intended use. All other borrowing cost are charged to revenue.

l. IMPAIRMENT OF ASSETS

At the date of each Balance Sheet, the company evaluates internally, indications of the impairment if any, to the carrying amount of its fixed and other assets. If any indication does exist, the recoverable amount is estimated at the higher of the realizable value and value in use, as considered appropriate. If the estimated realizable value is less than the carrying amount, an impairment loss is recognized.

Reversal of impairment losses recognized in prior years is recorded when there is an indication that the impairment losses recognized for the asset no longer exist or have decreased. However, the increase in carrying amount of an asset due to reversal of an impairment loss is recognized to the extent it does not exceed the carrying amount that would have been determined (net of depreciation) had no impairment loss been recognized for the asset in prior years.

m. PROVISIONS, CONTINGENT LIABILITIES AND CONTINGENT ASSETS

Provisions involving substantial degree of estimation in measurement are recognised when there is a present obligation as a result of past events and it is probable that there will be an outflow of resources. Contingent Liabilities are not recognised but are disclosed in the notes. Contingent Assets are neither recognised nor disclosed in the financial statements.

Provident fund:

The Company manages Provident fund plan through a Provident Fund Trust for certain employees, which is permitted under The Employees Provident Fund and Miscellaneous Provisions Act, 1952. The plan envisages contribution by the employer and employees and guarantees interest at the rate notified by the Provident Fund Authority. The contribution by employer & employee, together with interest, are payable at the time of separation from service or retirement, whichever is earlier. The benefit under this plan vests immediately on rendering of service.

The Guidance Note on implementing AS-15, Employee Benefits(revised 2005) issued by the Accounting Standard Board (ASB) states that provident fund set up by employers, which require interest shortfall to be met by the employer, need to be treated as defined benefit plan. Pending the issuance of the Guidance Note from the Actuarial Society of India, the Company's actuary has expressed inability to reliably measure the Provident fund liability. However, there is no deficit in the fund in this regard.
